

ANTI-CORRUPTION ORGANISATION**January 2016 Report****Highlights**

- One (01) new complaint file opened this month
- AC hotline received **26** calls this month
- Health corruption hotline registered **4** calls this month

General

The AC hotline phone received 26 calls with 2 corruption complaints and corruption related offences and 2 non-corruption complaints.

Field missions were extremely limited this month because of the financial problems currently confronting AC but nevertheless, follow-up was done through the AC hotline phone following complaints received.

One new complaint file was opened.

A new case file on bribery was opened this month. The director of the Government Grade II Teacher Training College (ENIEG) at Nanga Eboko solicited a bribe of 10,000 FCFA from the victim who came to collect her diploma. Investigations are ongoing as AC intends to contact the school administration for clarification.

AC Hotline Phone

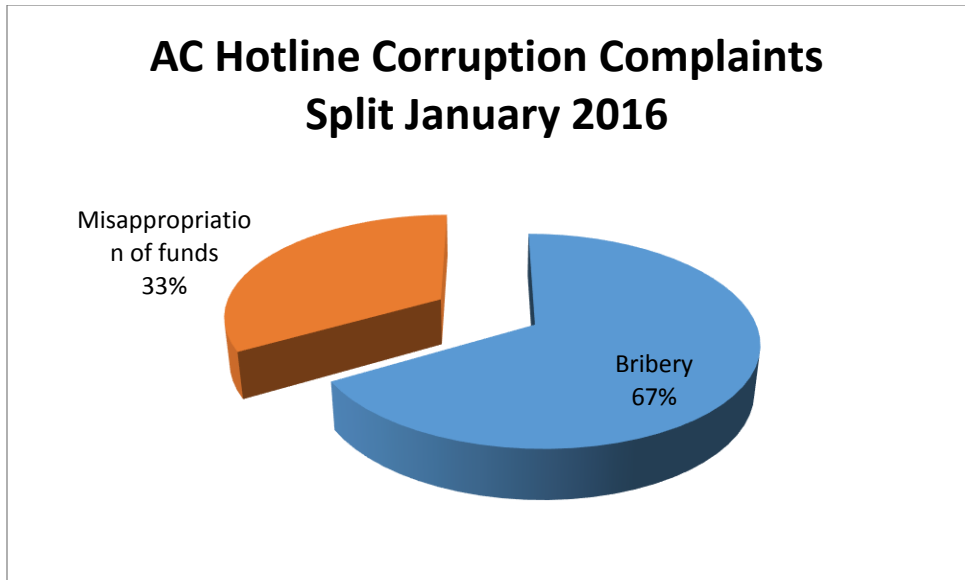

The AC hotline phone received 26 calls this month with a total of 4 complaints registered, 2 corruption complaints and 2 non-corruption related offences.

This month of January 2016, 54% of AC hotline calls were responsive while 46% of calls were non responsive. The reason for the high number of unresponsive calls is because most callers just flash, send beep-me messages or normal messages and because of financial constraints experienced by the team then, the calls could not be returned.

Corruption and non-corruption complaints both represented 50% each of the total complaints

Corruption by bribery was highest this month representing 67% of corruption complaints while misappropriation of public funds followed with 33% of complaints

Problems with obtaining land titles made up 50% of the non-corruption complaints received this month as well as private problems with the same 50%.

Gender

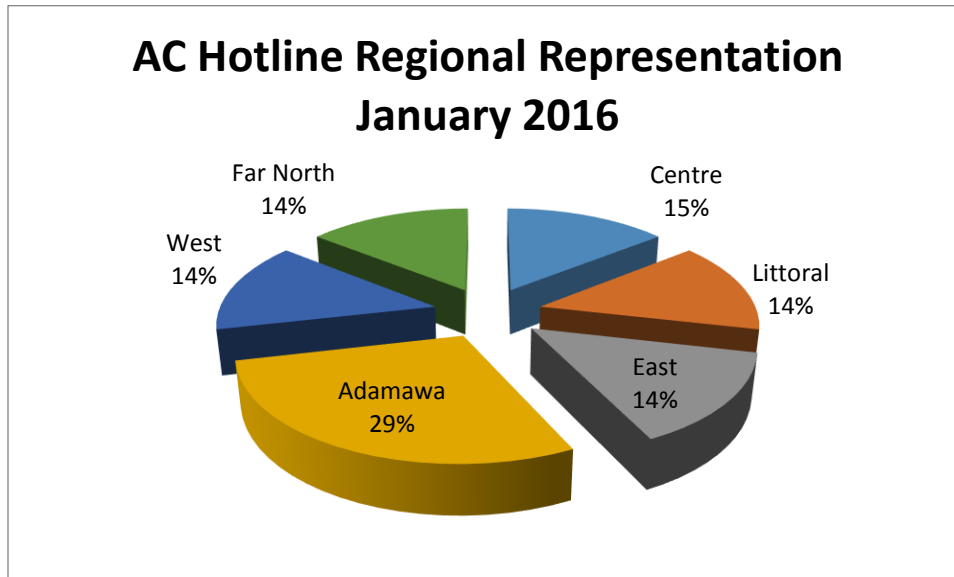

As usual, the male gender participated with the highest number of calls representing 90% of total calls while the female gender represented with just 10% of calls

Age range of callers

The adult age range had 50% of calls, followed by the youth age range with 36% and lastly, the elderly age range with just 9%

Regional Representation

The highest number of calls emanated from the Adamawa region representing 29%, followed by the Centre region with 15%, then the Littoral, West, East and Far North regions which all represented 14% each of calls

Email/postal complaints

One corruption complaint was received through the email address on Embezzlement of state funds.

Investigations

Investigations were carried out on a new bribery case file opened this month. The victim reported the director of ENIEG at Nanga Eboko for demanding 10,000 FCFA from her as bribe before she could collect her end of course diploma. Investigations are ongoing as AC intends to contact the school administration and verify why the student was demanded this sum of money.

Health Corruption Hotline

The health corruption hotline received 4 calls this month with no complaints registered. Most callers were persons seeking directions for the best hospitals to cater for their health needs. The reason for this decrease in calls and lack of complaints is justified by the fact that health corruption field work which normally enlightens the beneficiaries and incite them to call when they encounter difficulties in accessing healthcare and basic medications have not been carried out since last year thus the reduction in the number of calls and complaints. The data has been analyzed and represented below.

Anti – Corruption Cameroon (AC - Cameroon)

Website: www.kick-corruption.org

ac.cameroon@yahoo.com

This month of January 2016, 75% of health corruption calls were responsive while 25% of callers' numbers were unresponsive.

Gender

The male gender participated most with 67% of callers being male while the female gender participated with 33% of calls

Age-Range of Callers

The adult age range put in 67% of calls while the youth age range put in 33% of calls. The elderly age range was non participant this month.

Regional Representation

This month of January 2016, just three out of the ten regions participated in calls. The Adamawa region was the highest represented with 50% of total calls, followed by the Centre and North West regions which both had 25% each.
